

Curriculum vitae

Personal information:

Name: Nasdala, Lutz Johannes
Date of birth: 15/01/1964
Place of birth: Wittichenau, Germany
Citizenship: Germany

Contact information:

Institut für Mineralogie und Kristallographie
Universität Wien
Josef-Holaubek-Platz 2
A-1090 Wien, Austria
<https://mineralogie.univie.ac.at/scistaff/lutz-nasdala>

Phone: +43-1-4277-53220
E-mail: lutz.nasdala@univie.ac.at

Education:

- Habilitation (Mineralogy): "Metamictization of zircon". Institut für Geowissenschaften, Johannes Gutenberg-Universität Mainz, Germany, 2001. Horst Böhm, Thesis Advisor
- Dr. rer. nat. (Mineralogy): "Raman-spektroskopische Untersuchungen an ausgewählten Mineralen". Institut für Theoretische Physik, TU Bergakademie Freiberg, Germany, 1993. Jochen Monecke, Thesis Advisor
- Diploma (Mineralogy): "Raman-spektroskopische Untersuchungen an Glimmern". Institut für Mineralogie, Bergakademie Freiberg, 1990. Dieter Wolf, Thesis Advisor

Professional positions:

- Professor of Mineralogy and Spectroscopy: Institut für Mineralogie und Kristallographie, Universität Wien, Austria; 07/2009 – present
- Professor of Mineral Spectroscopy (Marie Curie Chair of Excellence): Institut für Mineralogie und Kristallographie, Universität Wien, Austria; 04/2006 – 06/2009
- Professor of Mineralogy (C2/W2; replacement of C3): Institut für Geowissenschaften, Johannes Gutenberg-Universität Mainz, Germany; 04/2002 – 03/2006
- Researcher and Lecturer: Institut für Geowissenschaften, Johannes Gutenberg-Universität Mainz, Germany, and GeoForschungsZentrum, Potsdam, Germany; 06/2001 – 03/2002
- Guest Professor: Institut für Mineralogie und Kristallographie, Universität Wien, Austria; 03/2001 – 05/2001
- Postdoctoral Appointee: School of Applied Geology, Curtin University of Technology, Perth, Western Australia; 03/1998 – 06/1998 and 09/1999 – 11/1999
- Postdoctoral Appointee (Habilitation): Institut für Geowissenschaften, Johannes Gutenberg-Universität Mainz, Germany; 03/1998 – 02/2001
- Postdoctoral Appointee: Institut für Mineralogie und Kristallographie, Universität Wien, Austria; 10/1996 – 02/1997

- Postdoctoral Appointee: School of Applied Geology, Curtin University of Technology, Perth, Western Australia; 01/1996 – 05/1996
- Postdoctoral Appointee: Institut für Theoretische Physik, TU Bergakademie Freiberg, Germany; 08/1995 – 02/1998
- Postdoctoral Appointee: School of Ocean and Earth Science and Technology, University of Hawai'i at Manoa, Honolulu, U.S.A.; 03/1994 – 08/1995
- Scientific Assistant and Researcher: Institut für Theoretische Physik, TU Bergakademie Freiberg, Germany; 09/1993 – 02/1994

Research areas:

[A more detailed description with illustrations is available at
<https://mineralogie.univie.ac.at/scistaff/lutz-nasdala/in-forschung/>

- Radiation damage in U- and Th-bearing minerals
 Effects of radiation damage on property changes; effects on Pb loss (U–Pb discordance); effects of on He diffusivity (thermochronology); potential of mineral-based ceramics in immobilising nuclear waste; understanding of why some minerals (zircon, allanite) may become aperiodic and others (monazite) not.
- Effects of corpuscular irradiation
 Light- and heavy-ion irradiation experiments; quantification of irradiation effects (also in view of understanding natural radiation damage); depth profiles of irradiation-induced changes; effects of irradiation-created defect centres on colouration and/or luminescence.
- Application of spectroscopic in situ-analyses
 Identification and characterisation (degree of damage, stress/strain) of phases on a μ m-scale; potential applications of excitation spectroscopy in mineralogy.
- Application of imaging and mapping techniques
 Unravelling internal textures of minerals and materials (growth, alteration, diffusion, etc.), especially of REE-bearing accessories; strain distribution patterns around inclusions in diamond.
- Gemstone analysis
 Investigation of natural and synthetic gem materials, with particular focus on treatments. Most recently spectroscopic analysis of 172 gemstones in the Imperial Crown of the Holy Roman Empire; <https://www.projekt-reichskrone.at/>; <https://fgga.univie.ac.at/reichskrone/>.
- Well-characterised minerals as analytical references
 Characterisation and proposal of gem-quality minerals (zircon, baddeleyite) as analytical references, especially for SIMS (secondary ion mass spectrometry) U–Pb geochronology.

Publication record:

- 171 articles and book chapters (82 first author, 89 co-author)
- 198 conference abstracts (70 first author, 128 co-author)
- Web of Science (Clarivate AnalyticsTM): Hirsch index = 48
 total citations 14221 (as of 18 October 2024)
- List of all publications:
https://mineralogie.univie.ac.at/fileadmin/user_upload/i_mineralogie/PDFs/Papers/Nasdala_Nasdala_Publications.pdf

Ten most important academic publications during the past ten years:

- Nasdala, L., Fritsch, E. (2024) Luminescence: The “cold glow” of minerals. *Elements* 20(5): 287–292. <https://doi.org/10.2138/gselements.20.5.287>
- Cameron, E.M., Blum, T.B., Cavosie, A.J., Kitajima, K., Nasdala, L., Orland, I.J., Bonamici, C.E., Valley, J.W. (2024) Evidence for oceans pre-4300 Ma confirmed by preserved igneous compositions in Hadean zircon. *American Mineralogist* 109(10): 1670–1681. <https://doi.org/10.2138/am-2023-9180>
- Nasdala L, Lamers T, Gilg HA, Chanmuang N C, Griesser M, Kirchweger F, Erlacher A, Böhmler M, Giester G (2023) The Imperial Crown of the Holy Roman Empire, part I: Photoluminescence and Raman spectroscopic study of the gemstones. *J Gemmol* 38(5), 448–473. <https://doi.org/10.15506/JoG.2023.38.5.448>
- Ende M, Chanmuang N C, Reiners PW, Zamyatin DA, Gain SEM, Wirth R, Nasdala L (2021) Dry annealing of radiation-damaged zircon: Single-crystal X-ray and Raman spectroscopy study. *Lithos* 406–407:106523. <https://doi.org/10.1016/j.lithos.2021.106523>
- Nasdala L, Akhmadaliev S, Burakov BE, Chanmuang N C, Škoda R (2020) The absence of metamictisation in natural monazite. *Sci Rep* 10:14676. <https://doi.org/10.1038/s41598-020-71451-7>
- Nasdala L, Schmidt C (2020) Applications of Raman spectroscopy in mineralogy and geochemistry. *Elements* 16(2):99–104. <https://doi.org/10.2138/gselements.16.2.99>
- Ginster U, Reiners PW, Nasdala L, Chanmuang N C (2019) Annealing kinetics of radiation damage in zircon. *Geochim Cosmochim Acta* 249:225–246. <https://doi.org/10.1016/j.gca.2019.01.033>
- Nasdala L, Corfu F, Blaimauer D, Chanmuang C, Ruschel K, Škoda R, Wildner M, Wirth R, Zeug M, Zoysa EG (2017) Neoproterozoic amorphous "ekanite" ($\text{Ca}_2\text{Th}_{0.9}\text{U}_{0.1}\text{Si}_8\text{O}_{20}$) from Okkampitiya, Sri Lanka: A metamict gemstone with excellent lead-retention performance. *Geology* 45(10):919-922. <https://doi.org/10.1130/G39334.1>
- Pearson GD, Brenker FE, Nestola F, McNeill J, Nasdala L, Hutchison MT, Matveev S, Mather K, Silversmit G, Schmitz S, Vekemans B, Vincze L (2014) Hydrous mantle transition zone indicated by ringwoodite included within diamond. *Nature* 507(7491):221–224. <https://doi.org/10.1038/nature13080>
- Nasdala L, Kostrovitsky S, Kennedy AK, Zeug M, Esenkulova SA (2014) Retention of radiation damage in zircon xenocrysts from kimberlites, Northern Yakutia. *Lithos* 206–207(1):252–261. <https://doi.org/10.1016/j.lithos.2014.08.005>

Other research achievements:

- Present position developed from Marie Curie Chair of Excellence (2006–2009; first mineralogy excellence chair in Europe ever)
- 2012–2017: FWF grant P 24448 “Spectroscopic study of ion-irradiated minerals”
- 2014–2015: Distinguished Lecturer of the Mineralogical Society of America
- 52 invited lectures / keynote lectures during the past ten years
- Main lecturer of nine invited spectroscopy workshops during the past ten years
- Lead guest editor of SI “Recent progress in the study of accessory minerals”, *Mineralogy and Petrology*, 2017 (<https://link.springer.com/journal/710/volumes-and-issues/111-4>)
- Lead guest editor of issue “Behind and beyond luminescence imaging”, *Elements*, 2024 (<https://www.elementsmagazine.org/>)
